# QUIZ - 1

Module – 01
Batch ID – JEE/CGNT-M/54/01
Exam Date – 29/01/2023
Total Marks – 50

Student Name: Student ID:

N.B. Please select multiple options if necessary. In case of multiple correct answers, the point will be divided equally among the answers. Any wrong answer in case of multiple answers will invalidate other correct answer(s) for that particular question. MCQ questions(1-40) are evaluated as 1 mark and descriptive questions (41 - 45) as 2 marks, total 50 marks.

### 1. What do you mean by DTD?

- a) Document type data
- b) Data type definition
- c) Document type definition
- d) Definition type document

### 2. What are meta tags used for?

- a) To store information usually relevant to browsers and search engines
- b) To only store information usually relevant to browsers
- c) To only store information about search engines
- d) To store information about external links

### 3. HTML documents are saved in?

- a) ASCII text
- b) Machine language codes
- c) Special Binary format
- d) None of these

### 4. The default character encoding in HTML5 is

- a) UTF-16
- b) UTF-32
- c) UTF-8
- d) ISO-8859-1

### 5. How can we resize the image?

- a) Using resize attribute
- b) Using height and width
- c) Using size attribute
- d) Using rs attribute

| a) Pixels b) Centimeters c) Dots per inch d) Inches  7. Which tag is used to define a block of text that have quotation marks? a) <quote> b) <mark> c) <blockquote> d) <quotetext>  8. In HTML, each parameter in RGB(red, green, blue) defines the intensity of the color between? a) 0-90 b) 0-255 c) 0-360 d) 0-Infinity  9. For controlling the page's dimensions and scaling which element is used in <meta/> tag? a) <scaling> b) <scale> c) <zoom> d) <viewport>  10. For adding quotation marks in web page paragraph or in line which tag we can use? a) <quotation> b) <quo> c) d) <q>&gt; d) <q> 11. For uniquely identifying an element name which attribute is used? a. Id b. Class c. Header d. none  12. Which of the following is not semantic element? a)  b) <article> c) <div> div&gt; div&gt; div&gt; div&gt; form&gt;</div></article></q></q></quo></quotation></viewport></zoom></scale></scaling></quotetext></blockquote></mark></quote>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 6.   | When creating a Web document, what format is used to express an image's height and widt |                                                                               |  |  |  |
